CRYPTOCURRENCY

SPARK X

- ❖ A cryptocurrency is a digital currency, which is an alternative form of payment created using encryption algorithms. The use of encryption technologies means that cryptocurrencies function both as a currency and as a virtual accounting system.
- ❖ To use cryptocurrencies, you need a cryptocurrency wallet. These wallets can be software that is a cloud-based service or is stored on your computer or on your mobile device.
- ❖ The wallets are the tool through which you store your encryption keys that confirm your identity and link to your cryptocurrency.

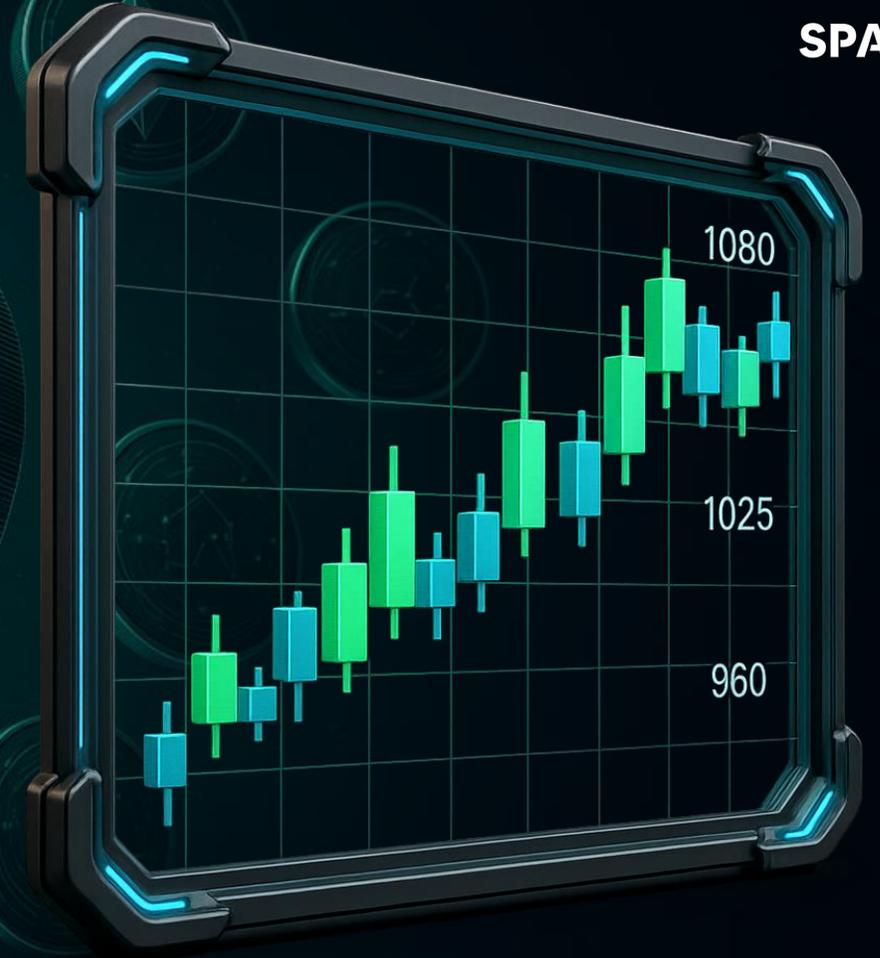

FOREX TRADING

SPARK X

Forex trading is the buying and selling of currencies with the aim of profiting from fluctuations in their exchange rates. It involves exchanging one currency for another in a pair, such as **EUR/USD**, by speculating on whether one currency will strengthen or weaken against the other. This is done in the foreign exchange (FX) market, the largest and most liquid financial market in the world.

BENEFITS OF FOREX TRADING

CRYPTO NETWORK

SPARK X

❖ SMART CONTRACT PLATFORM

Cryptocurrency transfers are broadcasted and validated via networks of computers called blockchain networks or cryptocurrency networks. A crypto token can be supported on multiple networks. And one network can support multiple cryptocurrencies.

❖ ETHER AS NATIVE TOKEN

Cryptocurrencies are digital tokens. They are a type of digital currency that allows people to make payments directly to each other through an online system. Cryptocurrencies have no legislated or intrinsic value; they are simply worth what people are willing to pay for them in the market.
